

Field Site Data Sheet      Scientists: \_\_\_\_\_ Subplot: \_\_\_\_\_ Date: \_\_\_\_\_

FIELD OBSERVATIONS		CALCULATIONS		
Subplot				
Tree Species	Number of Individuals or Stems (use tally marks)	Absolute Density in Subplot = total # individuals of particular species in the subplot	Absolute Density in Field Site = total # individuals of particular species in the field site	Relative Density in Field Site = absolute density in field site / total # of stems of all tree species in field site

**TOTALS (total # of stems of all tree species) =**

subplot	field site
